sean@seanculey.com

Sean Culey is an award-winning keynote speaker on supply chain transformation and disruptive technologies. He is also the author of 'Transition Point: From Steam to the Singularity', an in-depth examination of the causes of technological progress and how the current wave of change will disrupt our business models, economy and society at large.

He has over 25 years of experience in supply chain and technology, working across multiple industry verticals, from FMCGs to the UN and Aerospace and Defense. Sean is also a Visiting Fellow at Cranfield University, a Fellow of the Chartered Institute of Logistics and Transport (FCILT), Transformation Advisor for the Association of Supply Chain Management (ASCM) and the UK's only certified SCOR Master Instructor. He has recently been working with a Silicon Valley AI company on the new field of Decision Intelligence and is currently the Head of Supply Chain for the Manufacturing Technology Centre, the UK's national innovation centre.
